

SCIENCE & PSYCHOLOGY

APPLYING SCIENCE AND PSYCHOLOGY TO DANCE, MAGIC AND HYPNOTISM

13TH NOVEMBER 2023: LONDON & ONLINE | 10.30AM - 4PM

14TH NOVEMBER 2023: BRISTOL | 10.30AM - 4PM

ANDREW NEWTON

Hypnosis - is it real?

There will be a demonstration of hypnosis, always both fascinating and funny, after which Andrew will answer questions and you can consider how we can explain it.

DR LUCIE CLEMENTS

Dancing - Science and performance

The lecture will include live experiments and dancing, where you can learn how psychologists use dance to understand the mind and behaviour.

MIKE CARDWELL

Bad Science

We assume that all scientists are honest folk and that we can trust what we read in the scientific journals. But how true is that?

OLIVER MEECH

Magic - It's all about psychology

The real secret to magic tricks is that they're not about fooling the eyes, but bamboozling the brain. Every trick is a real-world psychology experiment. Discover how magicians can offer eye-opening insights into the way we think and act.

CARA FLANAGAN

Science - what's the point?

During the Pandemic the government said 'we are following the science'. But what does that mean? Is 'following the science' a rubbish idea? And what does this have to do with psychology?

DR CHANTELL DOUGLAS

Compassion and Human Suffering

Compassion in response to human suffering can impact on psychological, physical and community wellbeing. Compassion can shape our experiences and interactions with ourselves, others and the world.

My students absolutely loved the conference. They were buzzing.

Brilliant balance of education and entertainment. I bring students every year to kick start their understanding of science.

Suitable for A Level students and GCSE students
